

EXPLORING NATURE

to transform
industrial
chemistry

OUR VISION

is to discover chemical innovation for industrial success and empower our partners and customers to lead the way in addressing global challenges and improving lives!

We have come together through our shared passion for science and nature, and years of expertise in the industrial sector.

INDUSTRIES

Rubber industry

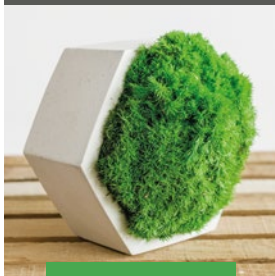

Circular industrial systems

Renewable energy

Construction

Our R&D team applies an interdisciplinary approach to steer the entire life cycle of a product or processes optimization solution – from concept and design, through all phases of testing and manufacturing, to scale up and disposal options.

INNOVATION

WHAT WE OFFER

Development of entirely plant based products for various applications in manufacturing processes

Contract R&D for specialized tailored solutions and scale-up

Unique solutions to complex chemical challenges based on extensive industry knowledge

Product Life Cycle Management

WHY US

Long-term industry experience and know-how in utilization of naturally based raw materials.

Cost transparency – budget planning according to detailed working packages and milestones.

First-class analytical support from recognised institutes.

In all stages of our activities we are committed to the key pillars of process development:

Replacement of hazardous materials with sustainable substances | Energy efficiency | Reduction of carbon footprint.

Sustainable solutions that align with your business goals.

Re- and upcycling.
